## Fire Hydrant Flushing

Starting August 6<sup>th</sup> 2025, Stratmoor Hills Water and Sanitation District will start a **Fire Hydrant Flushing Program**. The flushing of fire hydrants helps remove sediment and improve water quality while assessing water pressure and flow which will enhance the carrying capacity of pipes and ensures hydrants are ready for emergency use.

Residents and Businesses in the area where the flushing of the fire hydrants will be notified before due to the possibility of the water becoming discolored which is natural and goes away.

After the flushing of the fire hydrants Stratmoor Hills Water and Sanitation District staff will contact the residents and businesses directly to ensure all the water systems are operating correctly.

Please contact the main office for any questions or concerns. Thank you for your patience during this process.

Darren Adame  
District Manager
